

Adarsh Jha

Profile

Final-year Computer Science and Engineering undergraduate at Symbiosis Institute of Technology, Pune. Hands-on experience in building full-stack applications, cloud ETL pipelines, and data-driven systems. Possess a strong analytical mindset, ownership of end-to-end projects, and the ability to collaborate effectively in a team environment. Eager to contribute to data-focused and operational roles.

Technical Skills

Languages: Python, C++, C, JavaScript, SQL, Dart
Core: Data Structures, Algorithms, OOP
DSA Topics: Arrays, Linked Lists, Trees, Graphs, Hash Maps, Stacks, Queues
Algorithms: Sorting, Searching, DFS/BFS, Dynamic Programming, Greedy
Web & Mobile: React.js, Node.js, Express.js, MongoDB, Flutter
Tools: Git, Linux, VS Code, MySQL, Tableau, Jira

Problem Solving

- Practicing data structures and algorithms on LeetCode
- Familiar with problems involving arrays, graphs, and dynamic programming
- Developing approach to solve problems under time constraints

Projects

E-Commerce Sales Data Analytics (Python, SQL, Pandas)

View Dashboard

- Cleaned and analyzed e-commerce transaction datasets using Python and SQL to identify customer behavior, sales trends, and revenue insights.
- Performed data preprocessing, filtering, and aggregation operations on structured datasets.
- Built dashboards and reports for visualizing product performance and revenue growth.

Real-Time Fraud Detection System (Python, Data Analysis)

- Developed a fraud analysis system using AHP, TOPSIS, and ELECTRE multi-criteria decision-making algorithms.
- Applied weighted scoring and matrix-based comparison methods for analytical evaluation and decision support.
- Improved analytical modelling and data interpretation skills through real-world problem solving.

Hostel Management System (React.js, Node.js, Express.js, MongoDB)

- Built a full-stack hostel management platform with CRUD operations, search functionality, and responsive UI components.
- Integrated frontend interfaces with backend REST APIs and MongoDB database for efficient data handling.
- Implemented modular backend routing and database connectivity for streamlined operations.

QCERA Nepal Website (React.js, JavaScript)

- Developed a responsive client website focused on usability, accessibility, and clean UI design.
- Optimized layouts and frontend components for improved user experience across devices.
- Applied modern frontend development practices to improve responsiveness and performance.

Certifications

- AWS Cloud Practitioner Essentials – AWS
- Cloud Computing Fundamentals – IBM

Education

B.Tech in Computer Science Engineering

Symbiosis Institute of Technology, Pune 2023–2027

CGPA: 7.45 / 10

Higher Secondary Education (Class 12)

Arniko Awasiya Secondary School, Biratnagar, Nepal 2020–2022

GPA: 3.32 / 4
